

Gazi Sajid Salman

SOFTWARE ENGINEER | BACKEND DEVELOPER | FULL-STACK DEVELOPER

Nikunja, Dhaka, Bangladesh arnob2224@gmail.com linkedin.com/in/gaziarnob github.com/GaziArnob

PROFESSIONAL SUMMARY

Aspiring Software Engineer with hands-on experience building web, desktop, and IoT-integrated applications using Python, C#, JavaScript, SQL, and modern development tools. Strong foundation in backend development, database design, workflow automation, REST-style application logic, and deployment-ready project structure. Especially interested in Software Engineer, Backend Developer, and Full-Stack Developer roles where I can build reliable products and solve real user problems.

TECHNICAL SKILLS

Languages: Python, JavaScript, C#, SQL, C++

Backend and Web: Node.js, Express, HTTP servers, Flask-style Python web architecture, REST-style CRUD development

Databases: SQLite, SQL Server

Frontend: HTML, CSS, JavaScript, browser APIs, responsive UI basics

Tools and Platforms: Git, GitHub, PythonAnywhere, Render, openpyxl, Twilio, Arduino/SerialPort integration

Core Concepts: CRUD operations, authentication flow, file handling, data export automation, admin dashboards, multi-step workflows, IoT monitoring

SELECTED PROJECTS

IELTS Examination Platform

Python, SQLite, JavaScript, openpyxl

github.com/GaziArnob/Ielts-project

- Built a multi-step IELTS examination platform with candidate registration, Listening, Reading, Writing, and Speaking modules, plus result lookup and admin review workflows.
- Developed backend logic with Python and SQLite to manage candidate profiles, submissions, scoring flow, band calculation, publishing status, and exam progress across multiple pages.
- Implemented auto-scored Listening and Reading sections and supported manual examiner review for Writing and Speaking before publishing final results.
- Added browser-based speaking support using MediaRecorder for audio capture and Speech Synthesis for prompt playback, making the exam flow more interactive and realistic.

- Created spreadsheet export automation with openpyxl, including workbook generation, reporting sheets, and structured data export for operational review.
 - Structured the project for deployment with WSGI entry files, Render configuration, and PythonAnywhere-ready hosting files.

IoT Predictive Maintenance System

C#, SQL Server, Arduino, Twilio

github.com/GaziArnob/IOT-Predictive-Maintenance-System

- Developed a Windows Forms application for predictive maintenance and machine monitoring with modules for dashboards, worker records, machine records, maintenance actions, and reporting views.
- Integrated Arduino-based sensor input over serial communication to capture vibration, current, and voltage data in real time and store telemetry in SQL Server.
- Built operational controls to send machine start and shutdown commands, track incoming machine status, and log system actions into the database.
- Implemented searchable database management screens for worker and machine information, including record loading, filtering, updating, and deletion workflows.
- Added Twilio WhatsApp alert integration to support remote notifications and faster operator response to maintenance-related events.

Node.js Movie CRUD API

Node.js, JavaScript, JSON

github.com/GaziArnob/NodeJS-Project

- Built a modular CRUD API using Node.js with custom request handling for GET, POST, PUT, and DELETE operations.
- Organized the project into separate method handlers, utility modules, and JSON-backed data storage to keep server logic maintainable and reusable.
- Implemented server-side routing and file-based persistence for managing movie records in a lightweight API project.

ADDITIONAL TECHNICAL STRENGTHS

- Comfortable moving between backend logic, database operations, deployment setup, and basic frontend interaction.
- Strong project-based learning mindset with public GitHub work across Python, C#, JavaScript, data practice, and problem-solving repositories.
- Interested in building scalable web applications, backend systems, automation workflows, and data-driven software products.

EDUCATION

Bachelor of Science (B.Sc.)

American International University-Bangladesh (AIUB)

Expected Graduation: September 2027
